PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer and AI Automation Architect with **9+ years** of experience delivering high-impact government portals and enterprise systems serving **100,000+ users**. Proven track record of cutting result generation time by **50%** via optimized stored procedures, securing **50,000+ daily API calls** with enterprise-grade encryption, and reducing manual code-review time by **30%** through local-first AI integration (Ollama). Expertise spans PHP/Laravel architecture, REST/SOAP API security, BI dashboards, and emerging Agentic AI workflows.

CORE COMPETENCIES

Full-Stack Development (PHP/Laravel)	**AI & LLM Integration (Ollama, Gemini, Claude)**	**Secure API Architecture (REST/SOAP)**
Government Portal Engineering	Business Intelligence (Pentaho, Tableau)	DevOps & SDLC Management
Agentic AI Workflow Design	**Database Design (MySQL, PostgreSQL, MSSQL)**	**Technical Mentorship & Team Leadership**

PROFESSIONAL EXPERIENCE

Data Ingenious Global Limited, Jaipur | Senior Software Developer — *April 2024 – Present*

Lead Laravel Developer — Dual-Stream & On-Demand Admission Portal (RSOS)

- Architected and owned full SDLC for a mission-critical admission platform serving **100,000+ candidates** across Regular and On-Demand Examination (ODE) streams.
- Engineered automated seat-allotment and result-generation modules using Laravel + MySQL, **cutting processing time by 40%** versus the legacy system.
- Implemented Role-Based Access Control (RBAC) covering 15+ user roles, reducing unauthorized access incidents to **zero post-deployment**.
- Deployed local-first AI code-assistance using Ollama, **decreasing manual code-review cycles by 30%** and accelerating sprint velocity.
- Spearheaded integration of Google Gemini and Claude APIs into developer tooling (VS Code + Antigravity), **reducing debugging time by an estimated 25%**.
- Currently piloting Agentic AI workflows (n8n, LangChain) and .NET Core Web API to expand platform capabilities into microservice architecture.

DevIT Solutions Pvt. Ltd., Ahmedabad | Software Developer — *February 2020 – April 2024*

- Designed and delivered large-scale government web portals and e-commerce systems, serving **50,000+ daily users** across Rajasthan state departments.
- Secured **50,000+ daily API calls** for High Court and E-Court integrations using AES encryption and token-based authentication — zero data-breach incidents recorded.
- Reduced RSOS result-generation time by **50% by rewriting batch processes** as optimized MySQL stored procedures.
- Built seat-matrix algorithm for Paramedical Council multi-round counselling, handling category-wise allotments across 200+ colleges with **99.9% accuracy**.
- Designed Pentaho and Tableau BI dashboards for technical education departments, enabling real-time drill-down reporting for **10+ KPIs**.
- Managed end-to-end SDLC across PHP (Laravel, CakePHP, CodeIgniter), MySQL, MSSQL, Git, and IIS environments.

Akal Information Systems Ltd., Delhi | Software Developer — *October 2017 – January 2020*

- Developed and maintained enterprise web applications for government and corporate clients; contributed to API integration and database optimization projects.
- Collaborated with cross-functional teams to deliver secure, high-availability applications within aggressive timelines.

Vertex Plus Software Pvt. Ltd., Jaipur | Junior Software Developer *August 2016 – October 2017*

- Built responsive web applications and client portals using PHP, jQuery, and Bootstrap; first exposure to SOAP/REST API consumption.

On-Graph Technologies Pvt. Ltd., Jaipur | Junior Developer *December 2015 – August 2016*

- Developed CMS-driven websites and community portals; integrated SMS gateway and real-time notification systems.

KEY PROJECT HIGHLIGHTS

RSOS Student Lifecycle Portal (Rajasthan State Open School)

- End-to-end platform: Admission → Examination → Result Publishing, integrated with Rajasthan SSO.
- **50% reduction** in result generation time through stored-procedure optimization.

High Court & E-Court API Integration (Government of Rajasthan)

- Secured **50,000+ daily API transactions** using custom AES encryption/decryption middleware.
- Zero security incidents reported since go-live; solution adopted as standard for two additional GOR departments.

IT Job Fair Portal (State-Wide Multi-Location)

- Multi-location platform managing candidate/company registration, live vacancy tracking, and AI-assisted shortlisting.

Local AI Development Environment (Ollama + Gemini + Claude)

- Privacy-first LLM deployment enabling code generation, automated review, and architectural planning — no data leaves the local environment.
- **30% reduction** in manual code-review time; now piloting for automated test-case generation.

TECHNICAL SKILLS

Languages	PHP, JavaScript, SQL, Python (learning), C# / .NET Core (learning)
Frameworks	Laravel (8/10), CakePHP, Yii, CodeIgniter, jQuery, Bootstrap, Material CSS, Core .NET, WordPress, OpenCart
AI & LLM	Ollama (Local/Cloud), Google Gemini API, Claude (Anthropic), n8n, LangChain, LangSmith, AI-IVR systems
Databases	MySQL, MSSQL, PostgreSQL; learning ChromaDB & Vector Databases
BI & Analytics	Pentaho, Tableau — dashboards & drill-down reporting
DevOps & Tools	Git/GitHub, SVN, Vercel, Docker (learning), VS Code, Antigravity, IIS, XAMPP
Architecture	REST/SOAP APIs, RBAC, Microservices, SDLC management, Agentic AI Workflows

EDUCATION

Master of Computer Applications (MCA) 2015
Rajasthan Technical University, Kota

Bachelor of Computer Applications (BCA) 2012
University of Rajasthan, Jaipur

PROFESSIONAL PROFILE

- Translate complex architectural concepts into clear, actionable development tasks for junior team members.
- Consistent stakeholder collaborator — bridge between business requirements and technical delivery.
- Early adopter of AI tooling within development teams; currently evangelizing LLM-assisted coding practices across peers.
